

Track, manage, and inspect your safety equipment.

Scannable is the easiest way to track, manage and inspect your safety equipment, across any brand — using our mobile and web app. You get a single view of your inventory, inspection status, and compliance evidence.

What using Scannable means for you.

SCANNABLE FEATURES

-  **Instant access to all product data**
Technical specs, commercial info, compliance certificates, user instructions, location, inspection history, safety status and declarations of conformity.
-  **Add to inventory in multiple ways**
Easily add equipment to your digital inventory using Smart PPE™, equipment retrofitted with NFC tags, existing 2D codes or manual entry.
-  **Record pre-use inspections**
Quick, structured pre-use safety checks against each individual serialised item before it gets deployed on the job.
-  **Assign to a team member, location, kit bag or vehicle**
Assign equipment to a person, site, bag, or vehicle for full tracking across the lifecycle.
-  **Record interim inspections**
Log scheduled interim checks between formal examinations and keep a continuous audit trail of every touch.
-  **Run thorough examinations and generate PDF reports**
Conduct formal 6-monthly or annual legal inspections (LOLER, PUWER) and produce audit-ready PDF reports on demand.
-  **Automatic lifespan tracking and inspection reminders**
Scannable tracks lifespan expiry before they're due, triggers push notifications, and surfaces upcoming inspections before they're overdue.
-  **Push notifications keep you informed on gear safety status**
Product updates, safety alerts, and recall communications straight to everyone who needs to hear about them, via in-app notifications and email.
-  **Retire, fail, or flag equipment**
When gear expires or fails inspection, the platform supports managed retirement and quarantine flagging.
-  **Even easier equipment management with Smart PPE™**
Smart PPE™ comes loaded with the serial, batch and part numbers, date of manufacture, expiry date, plus all of the product's data and documents.

WHAT THAT MEANS IN THE FIELD

- 1** Answer any question about a piece of gear, instantly, from anywhere.
- 2** Build a complete asset register faster than any alternative on the market — no spreadsheets, no manual data entry.
- 3** Evidence compliance with regulation — every check, every item.
- 4** Know what you own, where it went, who has it, and whether it's safe to use.
- 5** An unbroken compliance record across the full working life of every asset.
- 6** Meet legal inspection obligations without the normal admin overhead costs.
- 7** Never miss an expiry or deadline — Scannable flags it before it's overdue.
- 8** Safety-critical updates land with the people using your gear via Scannable.
- 9** Stay operational at all times. Failed equipment never compromises the job.
- 10** Instant access to equipment info and compliance data straight out of the box.
